

# Multi-award winning Commodity Data Management platform for small, midsize and enterprise companies

Fully  
Scalable

Rapid  
Deployment

C/ETRM  
Integration

400+ Ready  
Data Sources

## Key Benefits

### The Competitive Advantage

- ✓ Low maintenance
- ✓ High availability
- ✓ Rapid deployment
- ✓ High return on investment
- ✓ Proven technology

## Key Features

### Smart Commodity Data Management

- ✓ Advanced auditing
- ✓ Data agnostic
- ✓ 400+ ready data sources
- ✓ Integrated modules
- ✓ Artificial intelligence

Genic  
**DataManager**™

Powerful, trusted and functionally rich

Increased competition, tightening profit margins, the new regulatory frameworks and Big Data all have a profound impact on the business landscape. Organisations need to recalibrate their business models to ensure survival at the basic level and to seek advantage. The future competitive advantage and productivity improvements require 'intelligent' technologies that can process, manage, analyse and provide 'actionable insight' from the unrelenting data streams.

The multi-award winning **Genic DataManager™** offers the next generation of architectural flexibility for managing all types of data adapting to changing business requirements and allowing controlled access to the full range of critical business information and complex analytics.

### Scalable & Functionally Rich

Genic DataManager™ is a dynamic platform that is designed for high performance, flexibility, ease of maintenance, component reusability and scalability. The integrated system supports advanced auditing, entitlements, data versioning, auto-generated calendars, a range of database options and extensive API's for application development.

### C/ETRM Integration

DataGenic offer seamless connectivity to your chosen C/ETRM platform with a range of pre-built adaptors - using on-demand, event driven technology or traditional pull-based methods. Whether your requirement is market data, forward curves, matrices or reference data, all data is cross-mapped and ready for system consumption.

### Rapid Deployment

Using standard content, best practices and repeatable processes, DataGenic ensures a rapid deployment within a handful of weeks, jump-starting the customer with a DataGenic footprint. With a highly skilled team of implementation consultants, customers are assured of quality, knowledge and thoroughness that goes far beyond our customer's expectations.

### 400+ Data Source Ready

Genic DataManager™ currently has access to over 400 data feeds. Data feeds are widely and globally sourced from a range of exchanges, government agencies and other trusted sources. Data can be provided in real-time, delayed, end-of-day or historically for maximum flexibility and analysis. Data feeds include energy, commodities, financial and economic.

Built to manage all of your data assets

Commodity Data	Prices, Volatilities and Indexes
Trading Data	Transactions, Bid/Offers, Counterparty
Risk Data	VaR, M-t-M, Reports
Metrological Data	Temperature, Precipitation, Wind
