

External Market & Proprietary Data direct to your Excel

Genic ExcelAdd-In allows users access to the full range of real-time, delayed, historical market and proprietary data directly into Microsoft Excel.

Key Benefits

DataGenic + Excel: The Ultimate Combo

- ✔ Single application for all data
- ✔ Real-time & end of day content
- ✔ Share data across your organisation
- ✔ Leverage DataGenic solutions via Excel
- ✔ Minimal training
- ✔ User familiarity

Key Features

Excel Acceleration

- ✔ Built-in conversion factors
- ✔ Execute business process workflows
- ✔ Auto data update
- ✔ Upload proprietary data
- ✔ Search, filter or navigate data
- ✔ Calendar and frequency selection

Organisations face ongoing challenges in unifying market and proprietary data with a common interface that users can easily access through a normalised data interface for analysis. DataGenic provide a bi-directional interface to the world's leading analysis package, Microsoft Excel, which offers rich functionality and set of tools that users are comfortable using, together with the combination of the DataGenic platform, proprietary data, real-time and end-of-day market data inventory.

Genic ExcelAdd-In™ provides an intuitive interface to users to access their universe of data, directly through Excel. Data can include time-series, structured series, matrices, forward curves and options with automatic or manual data updates. This familiar and powerful add-in provides permissioned users access to a corporate-wide data repository, through a low cost application, without compromising functionality, universe of data, periodicity or system control.

Upload Proprietary Data

With a bi-directional interface, users can easily upload data to the central repository at the click of a button. The pre-defined template structure normalises the data to ensure consistency and ease of use.

Commodity Conversions

Users can be confident that any cross-commodity conversions are performed using the vendor or organisation's conversion factors, ensuring consistency across the business and minimising any costly spreadsheet errors.

Data-Type Agnostic

From time-series data, forward curves, structured series, matrices and options, the Excel-Addin offers the ability to access all your daily data requirements. Combine this with proprietary data, such as trades, indices and portfolio calculations, and you have a powerful platform to perform your daily analysis.

400+ Data Feeds

Over **400** market real-time, delayed, end-of-day and historical datasources from around the globe, including Oil, Natural Gas, Power, Emissions, Coal, Ags, Softs, Freight, Petrochemicals, Financials, Economic, FX, Interest Rates and Fundamentals.

Search, Filter and Navigate

Free form 'google-like' searching, filtering or navigating by Market Basis, Supplier, Product or Data Type.

Multiple Data Types

Designed to handle time-series, curves, options, matrices and structured series.

DataGenic Formulas

Create and access the DataGenic server-side powerful formula library via Excel Add-in.

Real-Time Add-In

Combine end-of-day data with real-time market content from exchanges, PRA's, ISO's or broker platforms.

Cross Commodity Comparison

Each data model has assigned product properties accessible for cross commodity analysis that can be edited using the built-in conversion factors.

Execute Workflows

All process flows, using the Genic Workflow application, can be accessed and executed via the Excel Add-In.

Data Scaling

The built-in conversions, allow ease of scaling without user-based formulas and data manipulation.

Calendars

Access all associated contract rollover and quoting calendars for all data models.

"The ExcelAdd-in offers a gateway to the richness of the DataGenic platform coupled with external market and proprietary data, all within a familiar application."

Colin Hartley, CTO, DataGenic

About DataGenic

DataGenic is the leading global provider of on-premise and in-cloud smart commodity data management software, delivering intelligent analytics, real-time data content and proven business value. The innovative solutions include a data-agnostic multi-commodity data management platform, visual mapping and management of business processes, extensive and extensible data quality management, unlimited forward curves construction and an intelligent decision framework.
